STEM Programs to Grow a Diverse Nursing Workforce

June 30, 2016
Jennifer A. Peed, MSW
Adriana Perez, PhD, ANP-BC, FAAN
Pamela L. McCue, MS, RN
Patricia Allen Ed.D, RN, CNE, ANEF, FAAN
Betty Adams PhD, RN
Today’s Webinar

• Describe current, innovative STEM programs that target early age students in diverse communities.

• Discuss opportunities to replicate or tailor strategies that may help strengthen State Action Coalition Diversity Action plans.

• Q&A

Jennifer A. Peed, MSW
Director, Office of Center Integration

STEM Programs – What & Why?

- S.T.E.M. – Education in science, technology, engineering, and mathematics has received growing attention over the past decade.
- Students in the U.S. are behind other nations on international assessments of science, mathematics, and problem-solving ability.
- This learning gap is disproportionately observed in minority and disadvantaged populations.
- Effective science education not only prepares students for a career in the sciences but has the added benefit of fostering scientific literacy. Increasing scientific literacy can lead to more informed decisions about health and disease and overall improvements in the public's health.

(ARRA, Impact Report)
Disparities in STEM Employment

Figure 9. Racial and Ethnic Representation in the STEM Workforce
(In percent. Data based on sample. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see www.census.gov/acs/www/)

Note: Native Hawaiian or Other Pacific Islander alone was combined with Some Other Race because of a small number of sample observations.
Source: U.S. Census Bureau, 2011 American Community Survey.
Pipeline programs in the health professions have a documented record of success across a spectrum of academic entry points, including secondary school (DHHS, 2009).

The most effective designs of pipeline programs include simple, structured activities targeting young student participants.

Policy recommendations include the continued support for HRSA’s Division of Nursing and other stakeholders to develop strategies to recruit, graduate and employ underrepresented minorities in nursing, starting with middle school programs.

(National Advisory Council On Nurse Education And Practice, 2013)
The RI STEM Expedition
“A Strategy to Diversify the Nursing and Health Professions Workforce”

Chief Executive Officer
RI Nurses Institute Middle College
Providence, RI
Mission Statement
To prepare a diverse group of students to become the highly educated and professional nursing workforce of the future.

Vision
To create an innovative high school experience that is student-centric, structured to foster a supportive learning environment, and committed to developing the skills, knowledge, and passion necessary to excel in the nursing and allied health professions.
Education Inequities (NCES, 2010)

Lower quality K-12 education

Score lower on standardized tests

Likely to have more inexperienced teachers and teachers not certified in content areas math/science

Tracking – students of color less likely to be placed in college prep courses (Fletcher, 2012)
What We Know

• Dual Track Career & Academic Courses more likely to attend college (Fletcher, 2012)

• Connection between core academic courses and career knowledge (Fletcher & Cox, 2012)

• Early interest strongest predictor of eventual employment in health/medical professions (Fuch & Miller, 2012)
What We Know

• Parent Encouragement of college attendance, math, science more (Fuchs & Miller, 2015)

• Algebra 1 by 8th grade and HS calculus –predictors of college health care degree (Fletcher & Cox, 2012)

• Career investigation begins in middle school (Cohen, Palumbo, Rambur, & Mongeon, 2004; Hoke, 2006; Knight, Abdallah, Findeisen, Devereaux-Meillo, & Dowling, 2011)
What We Know

• Early decisions dictate curriculum & effort in college
  (Cohen et al., 2004; Fletcher, 2012; Miller & Kimmel, 2012; The Sullivan Commission, 2004; Villarruel et al., 2001)

• Role models, mentors, real health care experiences

• Student self-efficacy & teacher expectations strong influence in pursuit of STEM career
  (Lee, Min. & Mamerow, 2015)
Key Components

- College Prep/STEAMM Curriculum
- Nursing/Health Care Knowledge
- Social Emotional Supports
- Dual/Concurrent College Enrollment
- Prof Socialization
- Workforce Exp
- Role Models
- Mentors
Key Components

- Professional Socialization
  - Values of Nursing
  - Professionalism
  - Scholarship
  - Empathy & Compassion
  - Character

- Workforce Experience
- Speakers/Mentoring
- Internships
- CNA/EMT/ First Aide/CPR

In Their Own Words

• “I have direction now. More than getting a piece of paper-a HS diploma does not mean much”

• “Teachers care here-my old ones did too-but the RINI teachers held a mirror up to me

• Before I did not know the concept of school. Why I was going-Just for going? RINI taught me knowledge is the best thing. It can get me places. I am going to college”
In Their Own Words

• “I learned about myself - I found my self-worth here”

• “I did not remember what empathy & compassion meant until you told me. I was treated that way by the teachers and staff.”

• “Professionalism is knowing who you are and where you are going. I feel powerful. I am proud of myself”

Statewide Initiative for STEM Education

- Texas Science, Technology, Engineering and Mathematics is also known as T-STEM
This “initiative provides a foundational approach to empower teachers, inspire students, and advance the studies in these four fields.

The state is home to 70 T-STEM academies and seven blended Early College High School (ECHS)/T-STEM Academies with more than 40,000 students across the Texas.

The T-STEM initiative is connected with a national STEM network.”
T-STEM Objectives

- “Increase the number of students entering postsecondary studies and careers in science, technology, engineering, and mathematics.

- Facilitate the promotion of quality school leadership that supports school redesign efforts, quality teacher recruitment and improved teacher preparation.

- Assist in the long-term educational and economic development, and alignment of these fields.”

Three Elements

• A three pronged approach enables T-STEM to be successful in Texas
Key Elements

• **T-STEM Academies** – demonstration schools and learning labs, which develop innovative methods to improve science and math instruction.

• **T-STEM Centers** –
  – located at universities and regional education service centers
  – create new STEM instructional materials, provide professional development.
  – coordinate with industry and business partners who provide resources for the T-STEM Academies.

• **T-STEM Network** –
  – serves as a conduit between T-STEM Academies and T-STEM Centers.
  – offers professional development, exemplary profiles and other STEM education resources.
To ensure fidelity to the model, T-STEM Academies use the T-STEM Design Blueprint, Rubric, and Glossary as a guide to build and sustain STEM schools that support the desired 7 benchmarks.

The blueprint/rubric is a 40 page “road map” addressing how the academy will self assess their compliance to the 7 benchmarks of the T-STEM Initiative …very detailed.

Benchmark 3 of T-STEM (Outreach, Recruitment and Retention Plans)

- First objective of this benchmark -
  - recruit and encourage participation from underrepresented student and families
  - including plans for transportation, child care for family events, and translation of all marketing tools.

- T-STEM in Texas includes grades 6-12, but nationally this initiative is beginning in pre-school

- Admission is by a lottery and open access for all (no GPA or testing criteria or past disciplinary problems)
- 50% or greater of the students selected are economically disadvantaged & underrepresented.
L.C. Anderson High School, located in northwest Austin serves a diverse population, with more than 50 different languages spoken in students' homes.

Anderson has been named a T-STEM academy by the Texas Education Agency.

Anderson’s career and technology programs highlight medical, engineering, film, manufacturing and computer science.
Anderson High School Demographics

- African American 5.7%
- Hispanic 32.3%
- White 50.9%
- American Indian 0.2%
- Asian 7.1%
- Pacific Islander 0%
- Two or More Races 3.8%
- Economically Disadvantaged 22.8%

- **STARR Performance Passing Rates Science 99% and Math 96%**
A College and High School Partnership

• STEM Program that promotes and advances education for multicultural high school students to baccalaureate nursing education.
  – Houston Independent School District Futures Academy
  – Houston Community College
  – Prairie View A&M University

• Professional development in health science

• Program and students access to committed resources

• Ongoing fostering student interest in health sciences
  – Results: High School Diploma to Associate Science in Nursing (ASN) to Bachelor of Science in Nursing (BSN)
Stem Education Coalition

• National initiative oversees policy on STEM education, gathers resources and maintains data and demographics on the STEM initiative

http://www.stemedcoalition.org/reports/
This link to the conference can be found at:

- Early use of math is predictive of later success
- Early math use transfers to other areas: oral language grows and self regulation increases
- Kindergarten math ability predicts whether a child will graduate from high school
- Start science in Pre-K (explore the way the world works)
Interactive Polling Question #1

• On the top right corner of your screen, please click the "polling" icon
• Please answer the following multiple choice question:

Are you are working with middle schools or high schools to promote diversity in nursing?

A. Yes
B. No
Interactive Polling Question #2

• On the top right corner of your screen, please click the "polling" icon
• Please answer the following multiple choice question:

Have you included middle schools or high schools as community partner organizations in your coalition?

A. Yes
B. No
Questions or Comments?

Press *1 on your telephone key pad to ask a question
(Please be sure to record your name after the prompt)
OR
Use the “chat” feature to send “everyone” a question.

If you are having trouble asking a question, please click the “Raise Hand” button on the bottom right of your screen.

You can find the recording, webinar summary, and additional resources by going to: www.campaignforaction.org/webinars.
Closing Thoughts

CAMPAIGN IMPERATIVES:

- Moving *BEYOND* Nursing!
- Must delivery short term *RESULTS* → while developing long range plans!
- Must have the *COURAGE* to place the right *LEADERS* at the helm – remove weak or ineffective *LEADERS*
- Must have *FUNDING* to sustain work
- Must not ignore *DIVERSE* stakeholders critical to success
- Must integrate *Culture of Health* opportunities into your work
